

MOHAMED MOUNIR

Flutter Developer

New Cairo, Egypt, Ashrafya Compound

mounirmohamed372@gmail.com +201011020577

SUMMARY

I am, Mohamed Mounir a highly skilled Flutter Developer with **over 3 years of experience** building cross-platform mobile applications with clean architecture and scalable code. Proven expertise in delivering production-ready apps across industries such as chat monetization, ride-hailing, car rentals, and gamified shop app.

Top Rated Flutter Developer on Upwork, recognized for consistent high-quality work, timely delivery, and excellent client satisfaction. Adept at collaborating with cross-functional teams, integrating third-party services, and deploying to both iOS and Android platforms. Passionate about crafting user-centric mobile experiences that drive engagement and business growth.

EXPERIENCE

- ❖ **Futter Developer - Full Time, Alpha Drive** ----- Dec 2024 — Current
Amman, Jordan
 - Contributed to the development of a **ride-hailing mobile application** similar to Uber/InDriver, tailored for the Jordanian market.
 - Implemented **real-time ride request and matching system** between drivers and passengers using WebSockets and location services.
 - Integrated **interactive maps and live tracking** using Google Maps API for both drivers and passengers.
 - Built features including: Fare estimation and dynamic pricing logic, Trip status updates, In-app chat between drivers and passengers.
 - Google play: https://play.google.com/store/apps/details?id=com.alpha.drive&pcampaignid=web_share
 - Apple Store: <https://apps.apple.com/eg/app/alpha-drive-customer/id6739975764>
- ❖ **Flutter Developer - Part Time, CHAQT LLC** ----- Nov 2024 — Current
USA
 - Developed and maintained a **chat monetization mobile app** for experts, influencers, and service providers using Flutter and Dart.
 - Implemented dynamic **per-message pricing** features including: Character-based pricing for text messages, Duration-based pricing for voice messages.
 - Built **real-time chat features** such as typing indicators, recording status, online/offline presence, message read receipts, message replies, starred messages, and more.
 - Integrated **Apple and Google in-app subscriptions** to unlock premium features and extended monetization controls.
 - Google play: <https://play.google.com/store/apps/details?id=com.chaqtapp&hl=en>
 - Apple Store: <https://apps.apple.com/eg/app/chaqt/id6743349098>
- ❖ **Flutter Developer - Freelance, Diyar United Company** ----- Apr 2025 — Current
Kuwait

Project: Marketplace App (MVP similar to Amazon)

At Diyar United Company, I worked as a Flutter developer on the MVP of a full-featured **marketplace mobile app**, designed to provide a seamless shopping experience similar to Amazon. I was responsible for developing and delivering core features of the application, including:

- **Product browsing, filtering, and searching**
- **Cart management and checkout flow**
- **Order tracking and history**
- **User authentication and profile management**
- **Push notifications and real-time updates**

The project followed **Clean Architecture**, ensuring high code maintainability and scalability. I implemented state management using **Cubit (Bloc)** and handled API integration efficiently with **Retrofit**, enabling structured and secure network communication.

❖ Flutter Developer - Part Time, Nextera Dec 2024 — Sep 2025

New Cairo, Egypt

Lahzi – Gamified E-Commerce App

- Developed a **gamified e-commerce mobile app** where product prices drop in real time over a limited period, creating a sense of urgency and competition among buyers.
- Implemented a **dynamic price-drop engine** with countdown timers and real-time UI updates synced via sockets.
- Built **live product offer screens** displaying, Initial and minimum price thresholds, Real-time price progression, Time remaining for each deal.
- Integrated **purchase locking mechanism** to ensure fair price claims during active countdowns.
- Apple Store: <https://apps.apple.com/eg/app/lahzi/id6745610221>

❖ Flutter Developer - Full Time, Rentx Jul 2023 — Dec 2023

Albania

- Developed a **mobile car rental application** from scratch, providing a seamless experience for users to browse, reserve, and manage vehicle rentals.
- Real-time car availability** with calendar-based booking system.
- Filter and search** by car type, model, price, transmission, and fuel type.
- Integrated **user authentication**, driver license upload, and identity verification processes.
- Developed **rental duration pricing logic**, including hourly, daily, and weekly rates.
- Implemented **in-app booking management**: view, edit, extend, or cancel bookings.
- Integrated **payment gateway** to handle secure online transactions.
- Google Play: https://play.google.com/store/apps/details?id=com.inoventgroup.rentx&pcampaignid=web_share
- Apple Store: <https://apps.apple.com/eg/app/rentx-car-rentals/id6446690464>

❖ Top Rated Flutter Developer, Upwork Jan 2022 — Current

Top Rated Flutter Developer on Upwork, recognized for consistent high-quality work, timely delivery, and excellent client satisfaction
